Samia Mora - Biography

Dr. Mora is a cardiologist and molecular epidemiologist conducting translational research in the prevention of cardiometabolic disease, with a focus on lipid and inflammatory mechanisms of cardiovascular disease. She is the Director of the Center for Lipid Metabolomics and Director of the Biorepository, Division of Preventive Medicine, and Associate Professor of Medicine at Harvard Medical School, with joint appointments in the Divisions of Cardiovascular Medicine and Women's Health. Leveraging her expertise in epidemiologic population studies, clinical trials, and novel platforms for molecular biomarker profiling, Dr. Mora's research focuses on 1) discovery and translational applications of lipid biomarkers of cardiometabolic disease risk and their interplay with inflammation, and 2) innovative approaches and therapies for preventing cardiometabolic disease. She received her undergraduate degree from Harvard University, and her medical degree from Harvard Medical School. Dr. Mora completed an internal medicine residency at Massachusetts General Hospital and a cardiovascular disease fellowship at The Johns Hopkins Hospital, where she also obtained a Masters in Health Science (Epidemiology) from the Johns Hopkins Bloomberg School of Public Health. Dr. Mora is board certified in cardiovascular disease and echocardiography, and serves on the Editorial Boards of *JAMA Internal Medicine* and *Atherosclerosis*. She is an Elected Member of the American Society for Clinical Investigation and the Association of University Cardiologists.
