

## Professor Stephen Nicholls

Stephen Nicholls is Director of Cardiology at Monash Health, Professor of Cardiology at Monash University and will be the Clinical Director of the Victorian Heart Hospital in Melbourne, Australia. He is a preventive cardiologist with a translational research program spanning from the lab bench through to leadership of large scale clinical trials. His major research interests focus on the role of lipoproteins and metabolic risk factors in atherosclerosis, development of emerging plaque imaging modalities and leadership of large scale clinical trials of novel cardioprotective therapies. He is a Past President of the Australian Atherosclerosis Society and Honorary Secretary of the Cardiac Society of Australia and New Zealand.
