R³i
Residual Risk Reduction initiative

INTERNATIONAL ATHEROSCLEROSIS SOCIETY

The International Atherosclerosis Society and the R3i Foundation are very pleased to announce the

Jean-Charles Fruchart Prize
in Nuclear Receptors and Atherosclerosis Research

The aim of the Fruchart Prize is to encourage basic, clinical and translational research in the areas relating to the role of nuclear receptors in the prevention and treatment of cardiovascular diseases. The prize will be awarded to an individual who has achieved these goals and continues to work towards that end.

The award recipient will have provided outstanding scientific medical, or organizational advancement in our ability to understand the functional involvement of nuclear receptors in atherosclerotic vascular disease and their athero-protective role to reduce the development of atherosclerosis.

This $ 20,000 Prize is sponsored by

the International Atherosclerosis Society and the R3i Foundation

We value your suggestions of candidates for this prestigious award which will be presented during the upcoming

XIX International Symposium on Atherosclerosis, Kyoto, Japan, October 24-27, 2021

Please send your nomination along with the candidate's CV and a letter in support of your candidate to the Nominating Committee for its consideration to

fruchartprize@athero.org by Tuesday June 15, 2021
