

## CHILEAN ATHEROSCLEROSIS WORKING GROUP

### ***Chilean Atherosclerosis Working Group Corporation Online Symposium***

***Santiago de Chile, September 29th, 2021 (18:45-19:15 hrs, Chilean time)***

### ***Metabolic Dyslipidemia: the pending task in atherosclerosis***

#### **Program**

**Objectives:** Obesity is a public health problem in Latin America. In Chile, more than 30% of adult population is living with obesity. Obesity is associated with more than 100 different comorbidities, including dyslipidemia, that increase the risk of several chronic diseases, including cardiovascular diseases. This symposium aims to improve knowledge and awareness about metabolic dyslipidemia, its management and the benefit on CV disease.

**Chairpersons:** Dra. Ada Cuevas, Dr. Rodrigo Alonso. Center for Advanced Metabolic Medicine and Nutrition, Santiago de Chile. Chilean Atherosclerosis Working Group Corporation

**Invited Speaker:** Dr Alberto Lorenzati. Cardiologist and lipidologist. Co-Director of DAMIC Medical Institute/ Ruscullada Foundation for Research and Teaching in Medicine, Córdoba, Argentina. Past President of the Argentinean Cardiology Federation (FAC), Past president and co-founder of the Argentinean Lipid Society. Chairman of the Americas Federation Executive Committee, International Atherosclerosis Society.
